CURED BY CUTICURA

Not One Square Inch of Skin on His Whole Body Unaffected

"My little son, a boy of five, broke out with an itching rach. Three doctors prescribed for him, but he kept getting worse until we could not dress him any more. They finally advised me to try a certain medical college, but its treatment did no good. At the time I was induced to try Cuticura he was so had that I had to cut his hair off and put the Cuticara Ofnt-ment on him on bandages, as it was impossible to touch him with the bare ment on him on bandage, as it was impossible to touch him with the bare hand. There was not one square inch of skin on his whole looly that was notativeted. He was one mass of sores. The bandages used to stick to his skin and in removing them it used to take the skin on with the m, and the screams from the poor child were heart-breaking. I began to think that he would never get well, but after the second application of Cuticura Ointment I began to see signs of improvement, and with the third and fourth applications the sores commanced to dry up. It is skin pecled off twenty times, but it finally yielded to the treatment. Now I can say that he is entirely cured, and a stronger and healthier boy you never saw than he is to-lay." ROBERT WATTAM, 4922 Center Ave., Chicago, Ill., Dec. 30, 1897.

SIX YEARS LATER Mr. Wattam writes

"Your letter of the sist in regard to the case of my little boy at hand. I am truly thankful to say that the cure effected by the Culteura Remedies has been a most thorough and successful cure to date." Chicago, Feb. 23, 1905.
